[SPECIAL DISPATCH TO THE NEWS.] AUGUSTA, May 1.—The excursion party of narieston firemen arrived here this evening, d-were received by a delegation from the engned in front of the depot awaiting the arval of the excursionists. Chief Bryson devered the address of welcome, which was reonded to by Chief Nathan. He said that the nonstration was unexpected, but aptly illusated the hospitable character of the Georans, whose latch string always hung out.

The visitors were then escorted to the Planr's Hotel, where dinner was served. After ner they were escorted to the engine houses the Vigilant and Georgia, where refresh-nts had been prepared. Further interinges of courtesy then occurred. The pawas dismissed at seven o'clock, and at t o'clock the companies reassembled and rted the visitors to the depot. The streets thronged. There is much excitement in gard to the Atlanta tournament. Three steam mpanies and one hand company go from agusta. Others are expected from Rome, icon, Chattanooga and Nashville. PERSONNE.

GENERAL LEE AND PRESIDENT GRANT.

WASHINGTON, May 1 .- General Dent inform-General Lee that General Grant desired to him, and this morning General Lee, acpanied by Mr. and Mrs. Taggart, of Baltie, called upon the President. The interwas marked by great courtesy. When ral Lee was ushered into the Executive ice Minister Motley was present; the latter, ever, after a moment retired, thinking pers the interview between Grant and Lee had rence to national matters. It did not, howbeing confined to mere formal greetings ween the two. General Lee is staying in orgetown, and keeps entirely aloof from ablic observation. His visit to the White ouse this morning was the occasion of great terest. No other interviews were had with e President by any one after General Lee

NEW YORK, May 2.—The Sunday papers all entain special reports of General Lee's visit to resident Graut ; they state that when Gene-I Lee was at nounced, President Grant disissed a number of visitors, including Conessmen, telling them he had engagements th General Lee and must be excused. Then bllowed an interview of half an hour's dura-on, strictly private. It is the first meeting acy have had since they parted at Appomma x, April 9th, 1865.

THE CUBAN QUESTION.

Washington, May 1.—The Express says the English Minister denies that Great Britain has had under consideration the question of Cuban insurrection, and declares preposterous the report that it was ever designed to recognize the insurgents, and says the government had not even been informed of the existence of a provisional government on the island. He represents the relations of Spain with her Majes y's government as being highly friendly, and regards the report hereby contradicted as intended to embitter relations between the United States and Great Britain.

MURDER IN LANCASTER.—We understand from a reliable source that a negro man, formerly the property of Mr. Crow, of Union County, North Carolina, came to his death from violence on or about the 24th instant, twelve miles from this place. It seems that he was on the road after night, having in his possession a considerable amount of money, and it is supposed was assaulted and slain with an axe or some other heavy weapon, and then robbed of his money. No clue to the murderer or murderers has been found se far as we can learn. The murdered man was sober, industrious, and one of the best mill-wrights in our county, and by his skill as a workman had accumulated several hundred dollars in cash, which he was known to carry about his person.—Lancaster Ledger.

A decree had been given in this case in favor of the Building and Loan Association, by Chancellor Lesesne, but by permission it is being reargued. This suggests the mistake made by your correspondent "Corsair," in saying a Building and Lorn Association is a new thing here; such a corporation has been in

existence for the last forty years or more. The hotels and boarding bouses have disgorged themselves of their unusual number of guests, and the drizzly and gloomy day of yesterday has cooled our excitement down, and things appear duller than usual. HALIFAX.

WARMTH FROM THE STARS.

[From the London Daily News.]

It would scarcely be thought by most persons (says our contemporary) that the stars supply the earth with an appreciable amount of heat. Even on the darkest and clearest night, when the whole heavens seem lit up by a multitude of sparkling orbs, the idea of heat is not suggested by their splendor. It will, therefore, seem surprising to many that men of science should assign no inconsiderable portion of our terrestrial heat supply to those distant twinkling lamps. It is not many years since Professor Hopkins, of Cambridge, went even farther, and expressed his belief that if the earth's atmosphere were but increased some 13,000 yards in height, so as to have an increased power of retaining the warmth pourdistant twinking kenge. To lambridge you can be since Professor Hopking, O Cambridge, of Cambridge,

to President Graut's late visit to the timb of Washington. The writer says:

The first object of interest which attracted the attention of the President was the tomb of Washington. On approaching it he took off his het and stood contemplating the tomb for some time, carefully reading all the inscriptions and asking several queetions of Secretary Borie, who visited the place thirty-three years age and many times since. At the mansion the President seemed to take a deep interest in everything walked through all the rooms and examined all the relies with great care, registering his name with the other visitors, 'U.S. Grant, Washington, D. O.' In the room used by Washington as a library the President took is cigar out of his pocket, and going behind the door to avoid the draught of wind, lighted it, smoking during the remainder of the visit. Among the passangers by the excurreon steamer was hirs. Dr. Hasbrouck, who pitched into Grant at the Dress Beform Convention so mercileasly lately. She was dressed in Bleomer costume, and attricted considerable attention, Grant himself looking after her, and smiling at the oddity of her attire.

They will be there punctually, no doubt.

THE EVER FAITHFUL ISLE.

CHARLESTON, S. C., MONDAY MORNING, MAY 3, 1869.

Progress of the Revolution and the Prospect of Stamping it Out.

The glowing aspect of Cuban affairs at Washington seems to have passed away, and we now hear that advices favorable to the rebellion have been received there. It is reported that the third and last attempt of the Spaniards has failed, and the wet season approaches. It is oan independence, with a view to induce the establishment of a separate republic, and thus prevent annexation. It is known that there is considerable number of leading Cubans, especially the younger men, who favor the dea of a separate republic, and of endeavoring to establish a federation between Onba. Porto Rico and St. Domingo, with an eye to the inclusion of the English and French islands Every kind of rumor is affoat, and the arri-

val of a special agent of the government, sent some time since to Cuba to ascertain the condition of offairs in the island, is daily looked for. The action of the government, it is said. will depend, to some extent, upon the report made by the agent, who is a gentleman in whom the administration places implicit confidence. The report is looked for with considerable interest.

THE SITUATION.

THE SITUATION.

The Cuban Government is acting with rigor, and Count Valmaseda, commander of the Spanish forces in the Eistern Department has issued a proclamation, whereof the following are the chief featur's: First, every native male over fifteen years of age found away from his residence without sufficient cause will be executed; second, ever uninhabited dwelling, and every inhabited dwelling, where a white flag is undisplayed, will be reduced to ashes; third, all women away from their houses will come to Bayamo or Jiquani, or they will be brought by force. The proclamation was dated Bayamo, April 4th. yamo, April 4th.
Dispatches dated the 28th state that ac-

cording to the Havana journals the news from the Eastern Department has of late been favor-able to the government. No great results are announced, but several skirmishes in which the announced, but several sairmishes in which the Spanish troops were victorious are reported.

According to the government accounts one thousand insurgents are still in the field, under command of Cabada, in the vicinity of Trinidad; the Governor of Remedics, who had returned from a military excursion through his district, announces that he has made arrangements to put down the insurrection in that vicinity, which we take to mean that it was not returned from a military excursion through his district, announces that he has made arrangements to put down the insurrection in that vicinity, which we take to mean that it was not yet put down; and in Neuvitas extensive preparations are being made for a campaign against General Quesada, who still holds all the country around P erto Principe. From the Eastern insur, its we have only an appeal from Generals Marmol and Figuredo for arms and recognition of their belligerent rights. In Havana men were arriving freely from Spain to replace the losses of the Spanish army, but they come miserably clad and unprovided with any of the elements for war. The spirit of the volunteers in Havana, however, provides them amply immediately on arrival, and they are at once sent to the scene of active operations. A battalion of negro troops has also been sent to the field from Havana, being the first, we believe, that has been put in active service. The pressure mon the treasury has led the foveriment to contemplate increasing, this present left of import duties. The war is now, in fact, a war of resources. From Spain the colonial authorities can hope for nothing but naked men in the shape of war material. Everything else must be provided from the resources of the colony, and these the government is pressing to the utmost. On the part of the Cubans the question is merely one of endurance. There is great difficulty, if not an impossibility, in driving them from the field if they choose to hold it in small bands adhering to the Fabian policy.

DEFEAT OF THE SPANIARDS.

The steamer Columbia, just arrived from Havana, brings private letters from trustworthy persons that citizens A. Cabede and Juan Villegas have appeared with reduced forces near the City of Trinical, and taken possession of all the arms and summunition belonging to the Spanish Government in the arsenal there, the troops being unable to prevent them from so doing. THE FLIGHT, OF DULCE'S SYMPATHIERS—THE

SPANIARDS' DISCOURAGEMENTS.

HAVANA, April 24.—The emigration of Cubans still goes on; perhaps half of those leaving now go to Mexico. The Spaniards, not liking the situation, are moving away also. Large numbers sail in every steamer for the peninsula, and, from the way their affairs are arranged before leaving, one could easily suppose that these emigrants have no expectation of returning. Evidently a good number of the Peninsulares expect the Cubans to succeed. Though they will all fell you that the insurrection is a petty affair, and will soon be overcome, yet, privately, their belief is that the United States will have the island, in any event, in less than fiv years. The Governor-general is constantly asking for additional reinforcements from Spain. He sees, as this fact shores that the insurrection is neither doad nor dying.

The revolution in the Eastern Bepartment is gaining strength. The Spanish troops in that portion of the island are suffering greatly from sickness. The Cubans are besieging and constantly harassing them, and the capture, of various convoys cause scardty of supplies and ammunition in the Spanish ranks. SPANIARDS' DISCOURAGEMENTS.

THINGS IN WASHINGTON.

Important Dispatches from Mexico-Treaty Cessions-Cubans Desirous of Buying Government Arms-Views of General Grant-Mr. Motley's Instruc-

The Washington correspondent of the Baltimore Sun, writing on Friday night, says:

Dr. C. W. Brink, United States Consul, arrived here yesterday, direct from Mexico, bearing dispatches of an important character to the President and Secretary of State, and to-day had an interview with General Grant. It is understood that these dispatches refer to negotiations between Minister Resecrans and the Mexican Government relative to certain treatgotiations between Minister Resecrans and the Mexican Government relative to certain treaties that the Mexican Government is desirous of entering into for the cession of certain portions of Mexico to the United States, for the purpose of raising money to support the Juarez government. General Rosecrans, it appears, would like to remain in Mexico to complete these negotiations, but unfortunately for him our new minister is now on his way, and will arrive there before an answer will be received by General Rosecrans.

Rosecrans.
Efforts have been made for some time by Efforts have been made for some time by several Cuban agents to purchase arms and supplies for the insurgents, but they have not succeeded. Quite recently they had an interview with General Grant upon the subject, when they were informed by him that if the government had any arms, munitions, &c., to spare, they would be disposed of to any one, the Fresident arguing that he had received no official notification of any recent battles between the Cubans and Spaniards, and therefore any supplies that could be spared by the government would be sold to either Cubans or Spaniards if they wished to purchase.

Among other things considered to-day at the Cabine's session were the instructions to be given to Minister Motley. It is understood that it was decided that the best policy would be for Mr. Motley to leave for his post at once, and before this government was officially in

and before this government was officially en-formed of any action on the part of the British Government in relation to the Alabama claims.

The Delaware papers report that though the fruit trees in the lower part of the pennisula of Delaware and Eastern Maryland have been seriously injured by the recent storm, the crop has not been totally destroyed, as was at first feared. In the middle tier of counties the damage is much lighter, and half a crop will probably be obtained. In Cecil County, Md., and Newcastle County, Del., the damage was very slight, and it is believed that a good average crop will be gathered. Another account asserts that on Chesspeake Bay, and wherever the proximity of large bodies of water neutralized the frost, the buds on the fruit trees are sound and healthy and are rapidly developing, but that about the latitude of Dover, Del., the damage is severe. North of Dover the prospects are favorable.
